Introduction

Overview

This document contains planned content for the Item Management (IM) 8.22 release, including new features and functionality, playlist updates, August 2021 GDSN 3.1.16 release updates and defect resolutions. Also included is future release information and system maintenance information.

Solutions Impacted

This release impacts the following 1WorldSync solutions:

- Item Management (IM)
- Product Introduction (PI/VIP)
- Content1

Release Dates

Release dates are as follows:

Release	Pre-Production	Production
Item Management (IM) 8.22 Content1 (CONE) 3.1.16	July 30, 2021 August 13, 2021	August 14, 2021
Product Introduction (PI/VIP) 4.22	July 23, 2021 August 13, 2021	

Documentation

The documents listed below are updated for this release and are available in the 1WorldSync Solution Center and Community Platform. Please review the document change records for details about the updates. See [Appendix B](#) for instructions to access documents in the 1WorldSync Community Platform or Solution Center.

- IM 8.22 Participant Dictionary
- IM 8.22 1WS XML Schemas
- IM 8.22 Data Source & Data Recipient 1WS XML Guides
- IM 8.22 Data Source & Data Recipient 1WS XML Samples
- IM 8.22 Data Source & Data Recipient Excel Companions
- IM 8.22 Inbound API Sample

IM Participant Dictionary

The IM Participant Dictionary now includes all IM validation rules in the 'IM Validations' tab. The 'IM Run Time' column allows you to filter based on when the validations are run (Item Load/Save or Item Pub/Sync).

New Features & Functionality

The following new features and functionality are included in this release for Item Management (Enhanced). For more in depth information, sign up for one of our [Content Synchronization for Business Professionals](#) or [Item Management Overview and Q&A](#) classes today!

SmartLabel

Have you ever scanned a QR code on a package with your smart phone to see more detailed information about the product, such as nutrition or allergen information on a food product? If so, then you are one of countless consumers that have viewed the SmartLabel page for that product.

1WorldSync now has a solution to produce **SmartLabel** pages directly from the data you have populated on your items in Item Management (IM)! We will host the pages and provide you, the brand owner, URLs that can be socialized in any way you choose, including creating QR codes that point to the URLs. With this release, you can generate SmartLabel pages for food items. We will extend our SmartLabel solution to include other product categories in future releases.

Our solution produces the SmartLabel page based on a snap-shot of your item in Item Management (IM) at the time the page is generated. Create SmartLabel pages one at a time or in bulk. Use the SmartLabel-Food playlist to help you easily populate the data captured in the SmartLabel page and access the SmartLabel URL (details for this playlist are included in the Participant Dictionary). Use the new SmartLabel report to identify items that have been updated since the SmartLabel page was generated.

Reach out to your Account Manager today to find out how you can get started!

The screenshot shows a web browser displaying a SmartLabel page for 'Mama Mia Extra Cheese Lasagna - 12 ounce container'. The page includes a navigation bar with tabs for Nutrition, Ingredients, Allergens, Features & Benefits, and Company, Brand & Sustainability. Below the navigation bar, key nutritional values are highlighted: 420 Calories, 6g Sat Fat, 780mg Sodium, and 6g Sugar. A detailed Nutrition Facts label is also displayed, showing the following information:

Nutrition Facts	
Usually 1 serving per container	
Serving size	1 Pkg
Amount Per Serving	
Calories	420
% Daily Value*	
Total Fat 20g	26%
Saturated Fat 6g	40%
Monounsaturated Fat 0.5g	
Polysaturated Fat 0.5g	
Trans Fat 0g	
Cholesterol 50mg	17%

The page also features a photo of the lasagna and a QR code (08521369742063) for scanning.

Export Filterable Item ID

Have you exported items and sorted the spreadsheet on a value populated for a repeating attribute (like Nutrient Type Code or Alternate Item Identification Agency) but then couldn't identify the item associated to the values because the key attribute fields on the "MORE" rows were blank? We've got you covered! You can now set the new **Filterable Item ID** option to Yes when generating an Export to populate Item ID and other key attributes (Information Provider GLN, Information Provider Name, Item Type, Target Market, Product Type) on all rows, not just the "ITEM" rows. This allows you to not only filter on these key attribute columns in the spreadsheet but also to identify the item regardless of which attributes you filter on in the spreadsheet.

Export Item

Select one or more Playlists you would like to use to export this 1 item.

All Attributes

This export will be presented in: English

Include valid values in export: ☐ Yes ☒ No

Export Data: ☒ Yes ☐ No

Export Digital Assets: ☐ Yes ☒ No

Filterable Item ID: ☒ Yes ☐ No

Turning this on repeats the Item ID to make your export filterable by Item ID.

Export Notification

Ever perform an export and wonder if it was processing? Well now you will be provided messages within the Message Center letting you know when the export request is submitted, when it starts processing, and when the export is ready!

The screenshot shows the 'Message Center' interface. At the top, there's a 'Refresh' button. Below it, a filter bar shows 'Filtered by: No Filters Applied' and buttons for 'Mine', 'Notification', and 'Download'. The main area displays a list of messages from 'Sheri@1ws.com' regarding 'Item Export Status'. The messages are: 'Export Completed Successfully' (11-AUG-2021 07:53:36), 'Export Request Processing' (11-AUG-2021 07:53:19), and 'Export Request Submitted - Pending Processing' (11-AUG-2021 07:53:19). To the right, the 'Item Export Status' section shows 'From: Sheri@1ws.com' and '11-AUG-2021 07:53:19'. It lists criteria: 'Item ID : 00061414001076' and 'Target Market : United States Of America'. A note at the bottom states: 'You will be notified via email at sbrackett@1worldsync.com when the export is available for download. You may also refresh the Message Center to see further updates related to this export.'

Delete DAM Images in Bulk

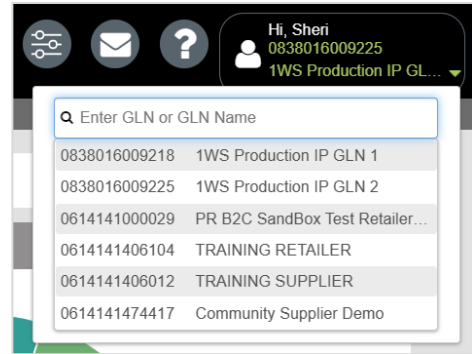

Image Metadata Studio can now help you further manage your DAM images with the ability to delete images in bulk. Simply search for and select the images to delete, click the trash bin icon in the upper right hand corner and select the **Delete Image** option. A pop-up will be presented to confirm the delete action and then the images will be deleted in real time, giving you the opportunity to stop the processes before it completes if necessary.

The screenshot shows the 'Image Search Results' interface. At the top, there are four tabs: 'Set Image Facing Value', 'Set Image Background', 'Set Is Primary Image', and 'Remove Attribute Value'. The 'Set Is Primary Image' tab is active, showing a 'Yes' button and a 'No' button with a dropdown menu. The dropdown menu includes options: 'Clear Image Facing', 'Clear Image Background', 'Clear Is Primary Image', and 'Delete Image' (highlighted with a red box). Below the tabs, there's a message: 'Quickly browse and update important Image-related attributes! We've applied some filters to expose your action items. Hover over tips icon for step by step instructions.' Below this, there's a 'Refined By' section with 'Consumer Unit' and 'Brand Name' filters, and a 'Clear all' button. The 'Active List' is set to 'Select'. A status bar indicates '2 items on this page are selected. | Select all 4 items.' The main table shows search results for 'Mama Mia' brand images. The table has columns: 'Digital Asset', 'Image Facing', 'Image Background', 'Primary Image', 'Type of Information File Name', 'Item Keys', 'Type', 'Brand', and 'Last Modified'. The first two rows are highlighted in yellow, indicating they are selected. The first row is 'Product Image Cheese Lasagna.jpg' with 'Image Facing' set to 'Front' and 'Primary Image' checked. The second row is 'Product Image Whole Lasagna.jpg' with 'Image Facing' set to 'Top' and 'Primary Image' unchecked. The third row is 'Product Image Cheese Lasagna2.jpg' with 'Image Facing' set to '-' and 'Primary Image' unchecked. The fourth row is 'Product Image Lasagna_Classic.png' with 'Image Facing' set to '-' and 'Primary Image' checked.

Remembered GLNs

Do you have to access your data across multiple GLNs within Item Management? Then you'll want to know about this enhancement! Now, your 10 most recently used GLNs are "remembered" and displayed for selection (most recent at the top) when you click to change your GLN. The remembered list is stored locally so it is based on your browser and environment (Production vs Pre-Production). If you clear your cookies and/or local site data, the remembered list is also cleared.

Marketing Message

We've made the Marketing Message input field larger by default so that you have more room to enter robust content. Remember that you can pull the slider at the bottom right corner of the field to enlarge it as needed!

GDSN 3.1.16 Release

Overview

The August 14, 2021 GDSN 3.1.16 Maintenance release contains updates to attributes, valid values, and validations. Item Management (IM) 8.22 includes the GDSN updates shown below. This is a backwards compatible release for IM.

- **Attributes**
 - [16 attribute additions](#)
 - [2 attribute changes](#)
- **Valid Values**
 - [190 valid value additions](#)
 - [13 valid value changes](#)
 - [1 valid value delete](#)
- **Validations**
 - [3 validation additions](#)
 - [2 validation changes](#)

New attributes are added exclusively in Item Management (IM) Enhanced. While some new attributes may appear in IM Classic, they will not all be available. We highly recommend you utilize IM Enhanced for full access to all attribution and functionality.

Full details on attributes, valid values and validations can be found in the IM 8.22 Participant Dictionary (refer to the document change record for specifics). *Note: See [Appendix B](#) for instructions to access documents in the 1WorldSync Solution Center.*

Item Load (FUSE)

An updated version of the Item Load (FUSE) spreadsheet for uploading data to Item Management (IM) will be provided to accommodate the new and changing attributes in this release. You can easily download the new version of the Item Load (FUSE) spreadsheet after the [release deployment dates](#) using the Export Data option in IM.

GDSN 3.1.16 Attribute Updates

Attribute Additions

16 new attributes are listed below with their 1WS XML name and grouped by module.

- **Dairy Fish Meat Poultry Item**
 - Cheese Milk Acquisition Type Code
cheeseMilkAcquisitionTypeCode
- **Food and Beverage Preparation Serving**
 - Product Texture Agency Code
productPreparationTextureInformation/productTextureAgencyCode
 - Product Texture Agency Code (Components)

GDSN 3.1.16 Valid Value Updates

Valid Value Additions

190 new valid values are included in the valid value lists shown below. The quantity of new valid values is shown for each valid value list. See the Participant Dictionary for full details.

- **Existing Valid Value Lists**

- AdditionalTradeItemIdentificationTypeCode (2)
- alternateClassificationSchemeCode (1)
- alternateItemIdentificationAgency (2)
- ConsumerSalesCondition (2)
- DAMReferencedFileTypeCode (6)
- DateOnPackagingFormatTypeCode (1)
- FeatureCode (16)
- FNBAAllergenTypeCode (14)
- FNBBCharacteristicCode (1)
- FNBDietTypeCode (4)
- NutrientBasisQuantityTypeCode (1)
- NutritionalClaimNutrientElementCode (18)
- NutritionalClaimTypeCode (2)
- PackagingMarkedLabelAccreditationCode (58)
- PackagingTypeCode (1)
- PreservationTechniqueCodeList (3)
- ReferencedFileTypeCode (6)
- StackingPatternTypeCode (1)
- tradeChannels (1)
- TradeItemRegulationTypeCode (2)
- uom (1)

- **New Valid Value Lists**

- CheeseMilkAcquisitionTypeCode (3)
- LicenseCode (19)
- MaterialDensityCode (11)
- ProductTextureCode (10)
- ProductTextureAgencyCode (1)
- TradeItemMaterialDesignationCode (3)

Valid Value Changes

13 valid value changes are listed below.

- **Description Change** – The following valid value lists have valid values (quantity shown in parenthesis) with description changes. See the Participant Dictionary for full details.
 - AdditionalTradeItemIdentificationTypeCode (1)
 - FNBNutrientTypeCode (6)
 - PackagingMaterialTypeCode (4)

1WORLDSYNC RELEASE NOTES: IM 8.22 V2

- **Planned for Future Deprecation** – The following valid value lists have valid values planned for deprecation in a future GDSN release.
 - PackagingMarkedLabelAccreditationCode – Valid value 'KAT' will be deprecated in a future release. Please use the new valid value 'ORIGIN_OF_EGGS' instead.
 - PackagingMaterialTypeCode – Valid value 'WIRE' will be deprecated in a future release. Please use the valid value 'WIRE' in the attribute Packaging Type Code (packagingInformation/packagingTypeCode) instead.

Valid Value Deletes

1 valid value delete is listed below.

- **Delete and Migrate** – The following valid value list has one valid value to be deleted in this release. Existing values in IM will be migrated during the respective Pre-Production and Production [release deployment dates](#).
 - tradeChannels – Valid value 'CHILD_NUTRITION_FOOD_SERVICE' will be deleted and migrated to the new valid value 'CHILD_NUTRITION_FOOD_PROGRAMS'.

GDSN 3.1.16 Validation Updates

Validation Additions

3 new validations are listed below with the GDSN # / IM Rule # and error code text.

- **Item Load Validations**
 - 1736 / 2773: Multiple values for Product Textural Characteristics (productPreparationTextureInformation/productTexturalCharacteristics) for each language are not allowed.
 - 1737 / 2774: Multiple values for Imitation Or Substitute For (imitationOrSubstituteFor) for each language are not allowed.
 - 1738 / 2775: Multiple values for Diameter (displayDimensions/dimensionDiameter) for each measurement are not allowed.

Validation Changes

2 changed validations are listed below with the GDSN # / IM Rule # and error code text as well as a description of the change.

- **Item Load Validations**
 - 1720 / 2741: One or more of the GTINs in each hierarchy must be marked as an INVOICE UNIT.
 - Change: Addition of target market '752' (Sweden) to the logic.
 - 1721 / 2742: isTradeItemAnInvoiceUnit must be populated for the trade item.
 - Change: Addition of target market '752' (Sweden) to the logic.

Other GDSN Updates

Other GDSN changes not associated to GDSN 3.1.16 are included in this release. Please see the Participant Dictionary for full details.

GDSN Attribute Updates

Attribute Additions

Several attributes will be added to Item Management (IM) ahead of GDSN standards. These attributes are listed below with their 1WS XML name and grouped by module.

- **Farming and Processing Information**
 - Bioengineered Declaration Claim Code
bioengineeredDeclarationClaimCode
- **Food and Beverage Properties Information**
 - Microbiological Organism Method of Analysis Code
foodAndBevMicrobiological/microbiologicalOrganismMethodOfAnalysisCode
 - Organism Minimum Value
foodAndBevMicrobiological/microbiologicalOrganismMinimumValue

Playlist Updates

Playlist updates are included in this release for Item Management (Enhanced). For additional information, see the *IM Playlists* and *IM Playlist Attributes* tabs in the Participant Dictionary.

What is a playlist?

A playlist defines a list of attributes and validations for a target such as a Recipient, Supplier, or industry. Associating a playlist with your item gives you the capability to ensure that you have access to all attributes needed to fulfill the requirements for your target.

Recipient Playlists

Updates to Recipient playlists are listed below.

New Playlists:

- **Sams- Food & Beverage- Baking Goods**
- **Sams- Food & Beverage- Dairy**
- **Sams- Furniture**
- **Sams- Sound & Recording**
- **Sams- TV & Video Displays**
- **Sams- Video Projectors**
- **SmartLabel-Food**
- **Target – Cosmetics**

Updated Playlists:

- **Bunzl- R3-264007** – Updated playlist name
- **Chemonics- LLIN** – Added attributes
- **Chemonics- Non-Pharmaceuticals** – Updated validations
- **Chemonics- Pharmaceuticals** – Updated validations
- **Delhaize** – Added attributes
- **FNS Food Distribution** – Updated validations
- **Giant Eagle** – Updated validations
- **Sam's- Mexico** – Added attributes
- **The Emerson Group** – Updated attributes
- **USDA** – Updated attributes
- **Wakefern Digcomm** – Updated validations
- **Wakefern Foods** – Updated validations
- **Wakefern NonFood** – Updated validations
- **Wakefern Pet** – Updated validations
- **Walmart- Mexico** – Added attributes
- **Walmart- US** – Updated attributes

1WS Category Playlists

Updates to 1WS Category (industry specific) playlists are listed below.

Updated Playlists:

- **Apparel** – Added attributes
- **Electronics** – Added attributes
- **Food And Beverage Products** – Added attributes
- **Hardlines** – Added attributes
- **Health, Beauty and Personal Care** – Added attributes
- **Media-Books-Music-Movie-Periodicals** – Added attributes
- **Medical Devices** – Added attributes
- **Pet Products** – Added attributes
- **Toys and Games** – Added attributes

Future Release Information

1WorldSync will implement updates for the **GDSN 3.1.17 Small Maintenance Release** in Pre-Production on November 5, 2021, and Production on November 20, 2021. These updates impact the solutions listed below.

- Item Management (IM)
- Product Introduction (PI/VIP)
- Content1 (CONE)

System Maintenance

Standard Maintenance Window

1WorldSync performs standard system maintenance, during which 1WorldSync solutions may be unavailable without prior notification. In addition, users may not be able to access the 1WorldSync Solution Center during these times.

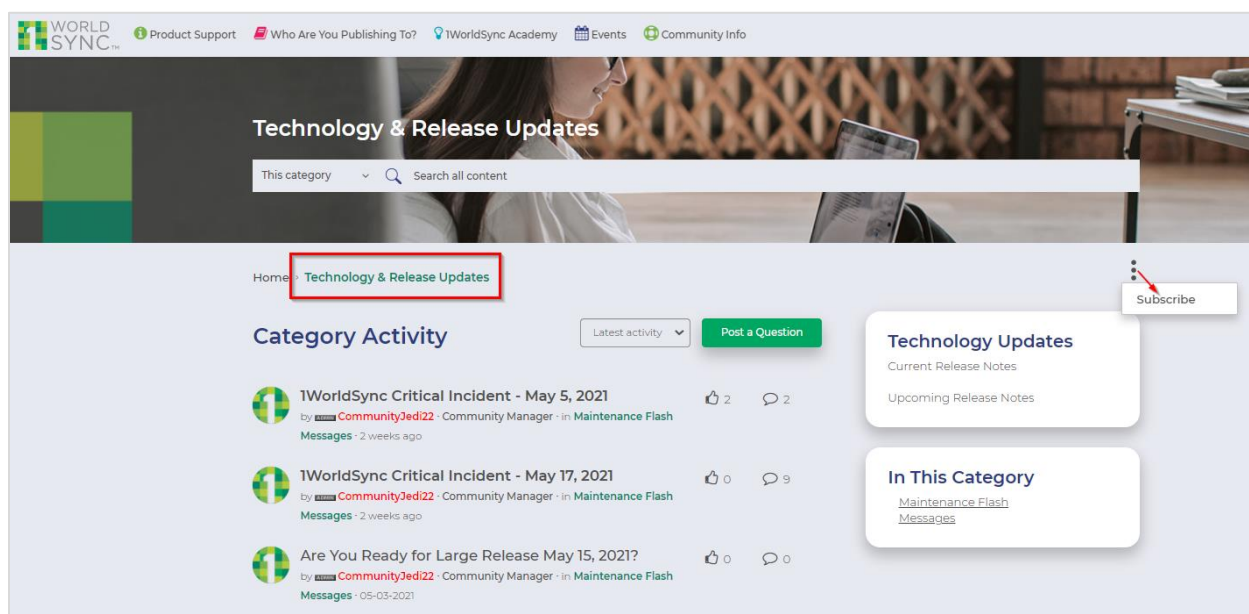

For machine-to-machine (M2M) communications, AS2 inbound messages to 1WorldSync will continue to be received during these times unless specific communication is provided indicating otherwise, but processing of AS2 transactions will be delayed until the maintenance is completed.

The standard maintenance windows are as follows:

Environment	Standard Maintenance Window
Pre-Production	Fridays 2:00pm – 6:00pm ET 19:00 – 23:00 GMT
Production	Saturdays 9:00am – 1:00pm ET 14:00 – 18:00 GMT

Technical Flash Notices

1WorldSync Technical Flash notices communicate upcoming scheduled maintenance dates and times. You can access these notices within our [Community Platform](#) under **Product Support > Technology & Release Updates**. If you would like to be notified via email, click the kebab menu icon  and click **Subscribe**.

The screenshot shows the 1WorldSync Community Platform interface. At the top, there's a navigation bar with links like 'Product Support', 'Who Are You Publishing To?', '1WorldSync Academy', 'Events', and 'Community Info'. Below this is a header for 'Technology & Release Updates' with a search bar. A breadcrumb trail shows 'Home > Technology & Release Updates', with the latter highlighted by a red box. The main content area is titled 'Category Activity' and lists three items: '1WorldSync Critical Incident - May 5, 2021', '1WorldSync Critical Incident - May 17, 2021', and 'Are You Ready for Large Release May 15, 2021?'. Each item includes a 'Messages' count and a 'Post a Question' button. On the right side, there's a 'Technology Updates' sidebar with 'Current Release Notes' and 'Upcoming Release Notes'. At the bottom right, there's an 'In This Category' section with a link to 'Maintenance Flash Messages'. A 'Subscribe' button is located in the top right corner of the page.

Appendix A: Revision History

Date	Release	Version	Description of Change	Author
07/16/2021	IM 8.22	1	Initial preliminary document	S. Brackett
